Eclipse Water Technologies

What We Do

We design, deploy, and support high-performance water treatment systems across Canada. Our modular solutions serve laboratories, hospitals, manufacturing plants, and industrial facilities with consistent, audit-safe water quality.

Core Services

- DI Systems & Mixed-Bed Resin Tanks
- Water Softeners & Activated Carbon Filtration
- RO Polishing & High-Resistivity Water (<18 MegOhm)
- Scheduled Regeneration & Emergency Swap-Out
- System Design, Installation & Commissioning
- Remote Monitoring & Telemetry
- PLC Optimization & Sensor Calibration

Industries Served

- Pharmaceutical & Biotech Labs
- Hospitals & Diagnostic Facilities
- Metal Finishing & Plating Plants
- Food & Beverage Processing
- Electronics & Semiconductor Manufacturing

Maintenance Experience

- Carbon filter rebedding and media replacement
- Softener resin rebedding and valve service
- RO membrane cleaning, disinfection, and normalization tracking
- Obsolescence management and upgrade planning
- Preventative maintenance programs and lifecycle audits

Why Eclipse?

- Canadian-owned and operated
- Not affected by U.S. tariffs or cross-border delays
- Responsive support across Ontario and beyond
- Audit-ready documentation and performance tracking
- Flexible service agreements and scalable solutions

Let's Talk

Whether you need high-purity water for a lab, a rinse line upgrade, or a full system redesign, Eclipse Water Technologies is ready to help. We'll tailor a solution to your flow rate, purity level, and compliance needs.
